Subject: FW: Miscellaneous Additional TMI Info

Found this e-mail in my search for the Cyndi Jones e-mail.

PS: Nothing needs bracketing on this e-mail or the HOO Highlight. Both can be released.

FYI... Bill Huffman

Subject: Miscellaneous Additional TMI Info

Ops Officer: BILL HUFFMAN
Entry Date : 11/22/2009 - 02:50
Entry Type : INFORMATION CALL
Notify Date - Time : 11/22/2009 - 02:45
Event Date - Time : - ()
Site : THREE MILE ISLAND
Emergency Class :

As a follow-up to my questions concerning the initial TMI event notification report, a Mr. Brad Parfitt called back and provided me the following information:

1) - 132 (of approximately 150 total) workers set off the HP portal monitors while exiting containment. Of the individuals that set off the portal monitors, all but 39 have been whole body counted at this time (0245 on 11/22). The highest levels found on any worker so far is 26 mR. The isotopes involved are Co-58; Co-60; Zr-95; Nb-95, and Cr-51.

2) - The radiation detected outside the reactor building was picked up on portable air samplers that had been in place at all the containment openings. No contamination was found anywhere else outside of containment.

3) - All of containment has been released by HP except the B Steam Generator D-ring area.
