Wilmington, NC 28402

SUBJECT: RENEWAL OF LICENSE SNM-1097, CORRECTION TO LICENSE CONDITION  
S-1

Dear Mr. Murray:

This letter refers to the U.S. Nuclear Regulatory Commission's (NRC's) May 19, 2009, renewal of Global Nuclear Fuel – Americas, L.L.C.'s (GNF-A's ) special nuclear materials license, SNM-1097. The license condition S-1, "Authorized use," that is currently in the renewed license contains two typographical errors and two omissions that the NRC is correcting in this letter. License condition S-1 currently reads:

S-1. Authorized use: For use in accordance with statements, representation, and conditions of application dated and supplements dated June 29, 2007; February 14, 2008; November 28, 2008, and January 8, 2009.

The following corrections are being made to license condition S-1:

- The date of the license renewal application was inadvertently omitted from the license condition. The license condition is being corrected to reflect the date of the renewal application – April 2, 2007 (ML071000128).
- The license condition S-1 also references the supplements to the license renewal application submitted by GNF-A; however, the dates in the current license condition are incorrectly stated. Accordingly, the license condition is corrected as follows:
  - The incorrect date of November 28, 2008, in license condition S-1 is corrected to read November 25, 2008, which is the date GNF-A submitted its "Response to Renewal of Materials License SNM-1097 Request for Additional Information (TAC L32629) Dated September 12, 2008," (ML083300489).
  - The date of January 8, 2009, which is the date GNF-A submitted "Additional Information Pertaining to Renewal of Materials License SNM-1097 Request for Additional Information (TAC L32629)" (ML090210283), is correct as stated and remains in the license condition.
  - The date of February 24, 2009, which is the date GNF-A submitted its "Response to Renewal of Materials License SNM-1097 Requests for Additional Information (TAC L32629) Dated January 15, 2009, and February 9, 2009" (ML090560191), having been inadvertently omitted previously, is added to the license condition.
  - The dates of June 29, 2007 and February 14, 2008, are removed from license condition S-1 because they refer to the Standard Practices and Procedures Plan

for the laser enrichment test loop, which is addressed in safeguards condition SG 4.1.

Corrected, license condition S-1 reads as follows:

S-1. Authorized use: For use in accordance with statements, representation, and conditions of the application dated April 2, 2007; and supplements dated November 25, 2008; January 8, 2009; and February 24, 2009.

If you have any questions regarding this letter, please contact Mary Adams of my staff at (301) 492-3113 or via e-mail to [Mary.Adams@nrc.gov](mailto:Mary.Adams@nrc.gov).

In accordance with 10 CFR 2.390 of the U.S. Nuclear Regulatory Commission's (NRC) "Rules of Practice," a copy of this letter and a public version of the corrected license Form 374 (from which licensed material possession limits have been redacted) will be available electronically for public inspection in the NRC Public Document Room or through the Publicly Available Records component of NRC's Agencywide Documents Access and Management System (ADAMS). ADAMS is accessible through the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room). A non-public version of the corrected license Form 374 will be withheld from public disclosure in accordance with 10 CFR 2.390.

Sincerely,
