SUBJECT: KEWAUNEE POWER STATION  
NRC SECURITY BASELINE INSPECTION REPORT 05000305/2010402(DRS)

Dear Mr. Heacock:

On February 12, 2010, the U. S. Nuclear Regulatory Commission (NRC) completed an inspection at your Kewaunee Power Station. The enclosed inspection report documents the inspection results, which were discussed on February 12, 2010, with Mr. S. Scace and other members of your staff.

The inspection examined activities conducted under your license as they relate to security and compliance with the Commission's rules and regulations and with the conditions of your license. The inspector reviewed selected procedures and records, observed activities, and interviewed personnel.

This report documents one finding of very low security significance (i.e., Green as determined by the Physical Protection Significance Determination Process). The deficiency was promptly corrected or compensated for, and the plant was in compliance with applicable physical protection and security requirements within the scope of this inspection before the inspector left the site. The finding had a cross-cutting aspect in the area of Human Performance, Work Practices [H.4(b)] because security personnel failed to follow established procedures. If you disagree with the characterization of any finding in this report, you should provide a response within 30 days of the date of this inspection report, with the basis for your disagreement, to the Regional Administrator, Region III, and the NRC Resident Inspector at the Kewaunee Power Station. The information you provide will be considered in accordance with Inspection Manual Chapter 0305.

Enclosure contains Sensitive Unclassified  
Non-Safeguards Information. When  
separated from enclosure, this transmittal  
document is decontrolled.
