Subject: Acceptance Review of TSTF-425 for LSCS

Mr. K. Nicely

LaSalle County Station.

SUBJECT: Acceptance of Application for Technical Specification Change Regarding Risk-Informed Justification for the Relocation of Specific Surveillance Frequency Requirements to a Licensee Controlled Program (Adoption of TSTF-425, Revision 3) (TAC Nos. ME3363-ME3364)

Mr. Nicely:

By letter dated February 15, 2010, Exelon Generation Company, LLC, submitted a license amendment request for the LaSalle County Station (LSCS), Units 1 and 2. The proposed amendment would modify the LSCS Technical Specifications by relocating specific surveillance frequencies to a licensee-controlled program with the implementation of Nuclear Energy Institute 04-10. The purpose of this letter is to provide the results of the U.S. Nuclear Regulatory Commission (NRC) staff's acceptance review of this amendment request. The acceptance review was performed to determine if there is sufficient technical information in scope and depth to allow the NRC staff to complete its detailed technical review. The acceptance review is also intended to identify whether the application has any readily apparent information insufficiencies in its characterization of the regulatory requirements or the licensing basis of the plant.

The NRC staff has reviewed your application and concluded that it does provide technical information in sufficient detail to enable the staff to proceed with its detailed technical review of the proposed request and make an independent assessment regarding the acceptability of the proposed request in terms of regulatory requirements and the protection of public health and safety and the environment. If additional information is needed for the NRC staff to complete its technical review, you will be advised by separate correspondence. If you have any questions, please contact the LaSalle Project Manager, Cameron Goodwin at (301) 415-3719.

Thank you,

Cameron Goodwin

Mrs. Cameron Goodwin
