Greg: Ken Milmine, Manager for Regulatory Affairs, called last week to inquire about the Moore Ranch schedule. I told him it was dependent on the issuance of the final GEIS in June 09 and the EA would tier off it. This seemed to upset him and he said that would adversely affect the construction schedule. I told him that we were already working on the EA, so progress was being made. I also told him that the GEIS could get done sooner and suggested that if his management had serious concerns about the schedule, then they should contact NRC management. Thanks
