**Attachments:** Letter Enclosure - Antelope and JAB Uranium Project Permit Area.jpg

Hello Bob,

I am preparing a NEPA environmental review for an application I've received here at the U.S. Nuclear Regulatory Commission from a company called Uranium One Americas. The proposed project is an in-situ uranium recovery facility, which would consist of two project sites (Antelope and JAB) to be located in Sweetwater County, WY. The center of the Antelope and JAB project sites would be about 15 miles and 35 miles west of Bairoil, respectively (please see attached file). Specifically:

The Antelope Unit - Township 26N, Range 93 West, Sections 11-15 and 22-24; Township 26N, Range 92 West, Sections 7-12, 14, 15-22, and 28-30.

The JAB Satellite Unit - Township 26N, Range 94 West, Sections 8-10, 13-15, 17, and 20-24.

I have a contractor helping to prepare the environmental review and they have identified some additional information needs regarding wildlife beyond what the applicant has provided. I've spoken with Mary Flanderka and Rick Huber about obtaining this information (identified in the email below from Amy Glovan). Mary and Rick suggested that you would have the best information regarding the non-game species.

Would you please take a look at the information needs I've highlighted below and let me know if you could help me obtain this information?

Thank you in advance for your time,

Mary and Rick,

I've attached a file depicting the proposed project location. Please let me know if you need anything else. If not, I look forward to whatever information you can provide/point me to. Thanks so much for your help.
