Subject: SEIS Jab-Antelope

Johari:

I am the Lander BLM lead for the Jap-Antelope SEIS. We are currently reviewing an EA submitted for the exploration phase of the operation. It appears from the website that your project is in the same area as the EA exploration. Please provide the GIS layer so that we can confirm this.

Please let me know what information you will need from the Lander Field Office for your SEIS. We are processing a number of EISs and EAs that have a higher priority than the SEIS but there will be opportunities to obtain the information you need as other workload allows. To this end it would be helpful if you supply a complete list of maps and data you will need.

Once I have a better understanding of what will be needed, I can schedule response times for you. Please feel free to call me if you have any questions.

Thank you.
