Subject: Preliminary Draft, Moore Ranch SEIS
Attachments: Moore Ranch SEIS (2).d

Dear Mr. Sokolosky,

The purpose of this email is to submit a preliminary draft of the Moore Ranch Project Supplemental EIS. Attached for your review are Chapters 1 through Chapter 4. Please review and comment on this document with a particular focus on Chapter 3 (Affected Environment) and Chapter 4 (Impacts). It is important for the BLM reviewers to understand that the document is in a preliminary final draft stage prior to final NRC management and legal review and concurrence. After management and legal concurrence, we will be publishing the draft SEIS for public comment.

The NRC staff is still in the process of revising this draft and as such, is still resolving remaining data gaps, confirming references cited, and finalizing document formatting. Our current schedule has this draft entering our agency publication review and printing processes by November 23, 2009.

Therefore, to allow for document revision and review/concurrence prior to that date, I ask that comments from the BLM be provided by October 5, 2009. However, depending on the extent of BLM's comments, I may not be able to completely address BLM's comments in the draft SEIS.

Additionally, I would like the opportunity to discuss by phone the BLM reviewers' main comments so that, again to the extent possible, I can address BLM comments before issuance of the draft SEIS for public comment. I would like to have this phone call on or before October 5th.

Thank you for your help on this.

Patti Swain
