Re: Additional Information for NRC Materials License # 21-32228-02  
Academic Cardiology Associates, P.C.  
**Control Number 318605**

Dear Mr. Macatangay:

**Item #1** On the NRC Form 313 item #3 listed the suite number. I verify the suite number designation is not necessary for our location of use.

**Item #2** Item # 9 "Radiation Monitoring Instruments" should have read:

**RADIATION MONITORING INSTRUMENTS**

8.17 Item 9

We have developed and will implement and maintain written survey meter calibration procedures in accordance with the requirements in 10 CFR 20.1501 and that meet the requirements of 10 CFR 35.61. Our facility has a GM Survey meter with a high range (0-2000 mR/hr) and low range (0-0.02mR/hr). We reserve the right to upgrade our survey instruments as necessary as long as they are adequate to measure the type and level of radiation for which they are used.

**Item #3** Item # 10 "Occupational Dose" should have read:

**RADIATION PROTECTION PROGRAM  
OCCUPATIONAL DOSE**

8.23 Item 10

Either we will perform a prospective evaluation demonstrating that unmonitored individuals are not likely to receive, in one year, a radiation dose in excess of 10% of the allowable limits in 10CFR Part 20 or we will provide dosimetry that meets the requirements listed under "Criteria" in NUREG-1556 Vol. 9, Revision 2, "Consolidated Guidance About Materials Licenses: Program-Specific Guidance About Medical Use Licensees.

If you have any questions or require additional information, please contact our physicist consultant, Kevin B. Miller at 734-662-3197.

Sincerely,

Martin F. McGough, M.D.  
Academic Cardiology Associates, P.C.
