Subject : Zion Nuclear Station / Decommissioning

Dear Mr. Hickman,

Thank you for courtesies extended and past communications related to the proposed License Transfer and Decommissioning of the Zion Nuclear Power Station in Zion, Illinois.

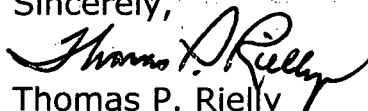

Pursuant to our recent email contact with you, we are a north suburban Chicago based social purpose Leadership Group who has been engaged since 2008 in the proposed Decommissioning and Prototype License Transfer initiative for the Zion Nuclear facility.

We are a skills based local community group composed of volunteer scientists, engineers, business executives and academics who problem solve issues with a public dimension. Presently, we are singularly focused on the Zion Nuclear Power Station's Decommissioning which is an Exelon Corporation asset. We are enclosing some overview information on Vista 360 for your review and consideration.

We espouse a policy of constructive engagement and look forward to addressing from a public perspective the many challenges ahead regarding the License Transfer and the Decommission process of the Zion facility.

Thank you

Sincerely,

Thomas P. Rielly
Executive Principal
