MEMORANDUM TO: Eileen M. McKenna, Chief  
AP1000 Projects Branch 2  
Division of New Reactor Licensing  
Office of New Reactors

FROM: David H. Jaffe, Sr. Project Manager  
AP1000 Projects Branch 2 /RA/  
Division of New Reactor Licensing  
Office of New Reactors

SUBJECT: SUMMARY OF A CATEGORY 1 PUBLIC MEETING HELD WITH  
WESTINGHOUSE ELECTRIC COMPANY REGARDING THE  
PROPOSED AP1000 DESIGN CHANGE PACKAGES, HELD IN  
ROCKVILLE, MARYLAND ON MARCH 17-18, 2010

The U.S. Nuclear Regulatory Commission (NRC) held a public meeting on March 17-18, 2010, at the NRC headquarters building in Rockville, Maryland. The NRC's Office of New Reactors (NRO), Westinghouse Electric Company (Westinghouse) staff, Westinghouse stakeholders, and members of the general public attended the meeting. Portions of the meeting were closed to the public for the purpose of discussing proprietary information. Enclosure 1 is a list of attendees. The purpose of this meeting was to discuss the design control package (DCP) process and the DCPs which would be included as part of the next AP1000 Design Control Document (DCD) revision.

#### Discussion

Westinghouse and the NRC staff held an extensive discussion on ISG-11, "Interim Staff Guidance – Finalizing Licensing-basis Information" and how the establishment of a design "freeze point" will affect the schedule for the Rulemaking that will conclude the current Design Certification Amendment (DCA) process; the decision as to whether DCPs are reflected in the DCD or implement by combined operating license applicants is an important decision. The staff observed that tracking design basis changes from certification through the duration of the facility lifetime represents a substantial challenge. The presentation slides for this portion of the meeting are in the Agencywide Documents Access and Management Systems (ADAMS) at Accession Number ML100890186.

Most of the remainder of the meeting was directed toward discussion of the proposed DCPs for inclusion in Revision 18 to the AP1000 DCD; these DCPs are described in a Westinghouse submittal dated January 20, 2010, (ADAMS Accession Number ML100250973) and a supplement dated March 12, 2010, (ADAMS Accession Number ML100750692). The NRC staff and Westinghouse discussed the individual DCPs with regard to safety significance, documentation and potential delay in DCA schedule. This portion of the meeting was closed to the public.

E. McKenna

-2-

Westinghouse and the NRC staff discussed various strategies for submittal of the remaining DCD revisions for the DCA.

Conclusion

Westinghouse advised the NRC of its intent to submit a revised description of DCPs to be included in Revision 18 of the DCD as informed by the meeting discussion.

Docket No. 52-006

Enclosure:  
As stated
