Subject: Drilling method description

Behram:

As we discussed, I am attaching an extract from an EA that Uranium One prepared for the BLM for our JAB and Antelope project that describes in detail the drilling method employed at ISR sites. I have included the cover page and the drilling discussion. The environmental impacts contained in the EA are lengthy and are specific to the existing environment at JAB and Antelope and would not have a bearing on the Moore Ranch.

I am also attaching the field procedure that our drilling personnel use to control this work. This is provided for informational purposes for your reviewers.

Please let me know if I can provide any additional information.

Best Regards,

Mike
