UNITED STATES
NUCLEAR REGULATORY COMMISSION
REGION III
2443 WARRENVILLE ROAD, SUITE 210
LISLE, ILLINOIS 60532-4352

MAR 21 2010

Chad J. Burnett
Radiation Safety Officer
Mead Johnson & Company, LLC
2400 West Lloyd Expressway
Evansville, IN 47721

Dear Mr. Burnett:

This refers to the letter dated December 11, 2009, and the application dated December 11, 2009, informing the NRC of the transfer of ownership and control of NRC Byproduct Material License No. 13-00772-02. Based upon our review of this correspondence, the NRC consents to the change of ownership transaction as stated.

Enclosed is Amendment No. 74 to your NRC Material License No. 13-00772-02 in accordance with your request. Please note that the changes made to your license are printed in **bold** font.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

In the course of our review, it appears that your attorney, Anthony C. Sullivan, signed the letter dated December 11, 2009, submitted on your behalf. This is not an acceptable signature as the NRC license is issued to senior management, who must sign all correspondence to us.

Please note that we can only accept such signatures if a senior licensee management representative, such as James T. Jobe, Vice President, either co-signs the letter or refers us to a “non-licensee signatory” as a “point of contact” via management-signed correspondence.

In addition, we noted that your application dated December 11, 2009, contained many pages of extraneous documents that were not necessary to process the change of ownership/control amendment. Typically, only the Form NRC 313 and the responses to NUREG 1556, Vol. 15, Appendix F are required to process a change of ownership/control amendment, unless other changes affecting the license will take place concurrently, such as changes in personnel, authorized materials, etc.

The enclosed document contains sensitive security-related information.
When separated from this cover letter this letter is uncontrolled.

~~Official Use Only – Security-Related Information~~

C. Burnett

In the future, kindly refrain from submitting materials that are not needed to process licensing actions. You may find good guidance to prepare licensing correspondence for your type of license in NUREG 1556, Vol. 4, which can be found on our website at:

<http://www.nrc.gov/reading-rm/doc-collections/nuregs/staff/sr1556/v4/index.html>

Please note that, at this time we updated your license to include a new Condition No. 23. This change should enhance your awareness of regulatory requirements associated with possession limits as they apply to decommissioning of your facility.

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system.

Pursuant to NRC's RIS 2005-31 and in accordance with 10 CFR 2.390, the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability.

The RIS may be located on the NRC Web site at: <http://www.nrc.gov/reading-rm/doc-collections/gen-comm/reg-issues/2005/ri200531.pdf> and the link for frequently asked questions regarding protection of security related sensitive information may be located at: <http://www.nrc.gov/reading-rm/sensitive-info/faq.html>.

A copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions.

~~Official Use Only – Security-Related Information~~

C. Burnett

Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

Sincerely,

Michael G. Herr, CHP
Materials Licensing Branch
