Dear Sir/Madam:

I support the proposal to produce cobalt-60 at the Hope Creek, NJ nuclear generating plant.

I have no financial interest in PSE&G, or in any other electricity-generating plant.

In addition, I favor construction of more nuclear generating plants, because they have been proven safe, produce electricity cheaper than any other method, and have a much smaller "footprint" than solar or wind generating plants.

Sincerely,

W. H. Day
