RE: Transfer of Materials License
License No. 37-30704-01
Docket No. 030-35895

Dear Ms. Miller:

This correspondence serves to request a change of ownership/transfer of Materials License between CMX, Inc. and Advantage Engineers, LLC (Advantage). The following information is being provided in response to the "Questions for Licensee Changes in Ownership".

- a. Provide a complete description of the transaction (transfer of stocks or assets, or merger).

CMX Inc. is in the process of "winding down" its operations. As a result the Pennsylvania offices operated by CMX were closed on March 12th, 2010. Advantage Engineers has since purchased equipment from CMX which includes nuclear density gauges and the CMX NRC license.

- b. Indicate whether the name has changed and include the new name. Include the name and telephone number of a licensee contact who NRC may contact if more information is needed.

The name of the new company (transferee) is:

Advantage Engineers, LLC
910 Century Drive
Mechanicsburg, PA 17055
Phone: (717)458-0800
Fax: (717)458-0801
Mr. Edward L. Balsavage, Managing Principal

- c. Describe any changes in personnel or duties that relate to the licensed program. Include training and experience for any new personnel.

The only change for the above referenced license program will be the RSO. The new RSO will be Michael Wright, please see attached RSO training certificate.

- d. Describe any changes in the organization, location, facilities, equipment or procedures that relate to the licensed program.

No changes in the organizations facilities, equipment, or procedures will be made. However, the location of the approved storage facilities will be amended.

telecommunications | environmental | geotechnical

910 Century Drive, Mechanicsburg, Pennsylvania 17055
(717) 458-0800 (717) 458-0801(fax)

Page 2 of 2

- e. Describe the status of the surveillance program (surveys, wipe tests, quality control) at the present time and the expected status at the time that control is to be transferred.

The surveillance program including all (surveys, wipe tests, and quality control) are current and in compliance. Advantage Engineers will continue to administer the required surveillance program.

- f. Confirm that all records concerning the safe and effective decommissioning of the facility will be transferred to the transferee or to NRC, as appropriate. These records include documentation of surveys of ambient radiation levels and fixed and/or removable contamination, including methods and sensitivity.

All records will be transferred to the transferee. No decontamination of facilities will be required.

- g. Confirm that the transferee will abide by all constraints, conditions, requirements and commitments of the transferor or that the transferee will submit a complete description of the proposed licensed program.

Advantage will abide by all constraints, conditions, requirements and commitments of the transferor.

- h. If your license requires financial assurance for decommissioning, you will need to address changes to financial assurance for name changes and/or change in ownership (control). If your company's name is changing and there is no change of ownership, you will need to amend your financial assurance instruments and supporting documents to address the change in name. If there has been a change of ownership (control), the transferee must submit new financial assurance in accordance with Chapter 4 to Volume 3 of NUREG-1757, "Consolidated NMSS Decommissioning Guidance."

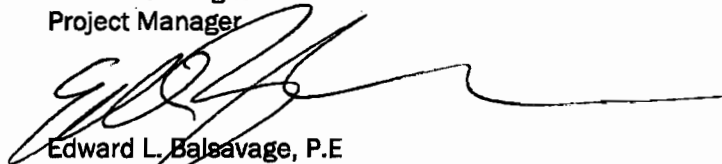

Advantage (transferee) will submit new financial assurance in accordance with Chapter 4 to Volume 3 of NUREG-1757.

We trust this is the information you require. Should you have any questions regarding this correspondence please do not hesitate to contact our office.

Sincerely,
Advantage Engineering, LLC

Michael J. Wright
Project Manager

Edward L. Balsavage, P.E.
Managing Principal

InstroTek, Inc.
Radiation Safety Officer Training

Mike Wright

Has successfully completed a certified course on the responsibilities of Radiation Safety Officer for portable nuclear gauges using special form nuclear material.

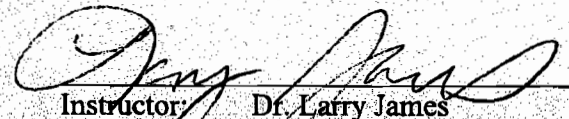

Subjects included were:

Responsibilities of Radiation Safety Officer
Commercial shipping of portable nuclear gauges
Applicable 10 CFR Regulations
