MAR 23 2010

Carlos A. Villarreal
Radiation Safety Officer
Tech Services Incorporated
5850 Arsenal Street
St. Louis, MO 63139

Dear Mr. Villarreal:

Enclosed is Amendment No. 07 renewing your NRC Material License No. 24-32205-01 in accordance with your request.

Please note that your license has been renewed for a ten-year term and will not expire until March 31, 2020.

In a letter dated February 18, 2009, received February 19, 2010, and a letter dated March 5, 2010, you indicated that you wished to release for unrestricted use the former storage locations at 2 Campbell Plaza, Building C, St. Louis, Missouri and 1600 Genessee Street, Suite 960, Kansas City, Missouri.

The NRC staff has reviewed your final status surveys. Based on its review, the staff has concluded that all licensable radioactive material has been removed from your former storage locations and residual radioactive material attributable to licensed activities does not exceed current NRC criteria.

Based on these conclusions no further remediation or actions with respect to NRC regulated material is required for these storage locations and are suitable for unrestricted use.

Please note that License Condition No. 13 has been added, which does not add new requirements but only highlights the regulatory requirements for establishing decommissioning financial assurance.

Also, License Condition No. 21 has been removed, as requested in your March 5, 2010, letter.

License Condition Nos. 11.B. and 11.C. have also been removed at this time. Condition No. 11.C. was removed because NRC can no longer permit portable gauge licensees to "self-appoint" Radiation Safety Officers (RSOs) internally, i.e., NRC must do that for you hereafter.

Please note that, in order to change your primary RSO in the future, you will also need to submit a written amendment request, including documentation that the proposed RSO has successfully completed one of the training courses described

C. Villarreal

in Criteria in the section entitled 'Individual(s) Responsible for Radiation Safety Program and Their Training and Experience – Radiation Safety Officer' in NUREG-1556, Vol. 1, Rev. 1, 'Consolidated Guidance about Materials Licenses: Program-Specific Guidance about Portable Gauge Licenses,' dated November 2001,“ or alternative, equivalent training. The proposed RSO should also submit a signed and dated statement that s/he accepts the position as RSO and s/he understands the duties and responsibilities associated with the position of RSO.

Condition No. 11.B. was removed because, at this time, we were unable to approve Robert Tarver as your proposed “Assistant RSO.” This is because the information in your letters dated January 20, 2010, February 18, 2009, which was received February 19, 2010, and March 5, 2010, was insufficient to complete our review.

If you wish to pursue this request, please submit the information requested below, address it to my attention as “additional information to control number 318521” to facilitate proper handling and we will continue our review.

Mr. Tarver was not approved as an “Assistant RSO” in part because we do not use “Assistant RSO” designations anymore. Mr. Tarver may be considered as an “Alternate RSO” if you specifically request that he be named “Alternate RSO;” stipulate, in writing, that he will act as RSO only in the physical absence of the RSO, Mr. Villarreal; and have Mr. Tarver submit a signed and dated statement that he accepts the position as ARSO and he understands the duties and responsibilities associated with the position of ARSO. Please note that a senior management representative, who may or may not be the current RSO of record, should also sign Mr. Tarver’s appointment request to serve as ARSO.

In addition, please clarify, in writing, within 30 days of the date of this letter, whether your company has experienced a change of ownership and/or control. This is being requested because we noted that your letter dated September 21, 2009, referred to your corporate name as “TSI Engineering, Inc” and your application dated January 20, 2010, referred to your corporate name as “Tech Services To Go, Inc. dba TSI Engineering, Inc.”

Please submit the information requested, address it to my attention as “additional information to control number 318521” to facilitate proper handling and we will continue our review. If you cannot submit a written response within the requested 30-day timeframe, please contact me at 630-829-9892 to arrange an alternative response date. This information is necessary in order to complete the renewal of your NRC license.

Please refer to 10 CFR 30.34(b) and NUREG-1556, Vol. 1, Rev. 1, 'Consolidated Guidance about Materials Licenses: Program-Specific Guidance about Portable Gauge Licenses,' dated November 2001, section 8.2 and Appendix C for regulatory requirements and guidance on how to respond if you already have experienced or will experience a change in ownership and/or control. Please note especially that NRC must consent to such transactions, in writing, before changes in ownership and/or control take place.

C. Villarreal

Additional guidance may be found on our website under "Information Notices," specifically "Information Notice No. 89-25: UNAUTHORIZED TRANSFER OF OWNERSHIP OR CONTROL OF LICENSED ACTIVITIES" at <http://www.nrc.gov/reading-rm/doc-collections/gen-comm/info-notices/1989/in89025.html> and "NRC INFORMATION NOTICE 89-25, REV. 1: UNAUTHORIZED TRANSFER OF OWNERSHIP OR CONTROL OF LICENSED ACTIVITIES," at <http://www.nrc.gov/reading-rm/doc-collections/gen-comm/info-notices/1989/in89025r1.html>.

Please also be reminded that an NRC-approved license amendment is required before receiving, using, and storing licensed material at an address or location not included with the application or already listed on the license, as included in 'NUREG-1556, Vol. 1, Rev. 1, 'Consolidated Guidance about Materials Licenses: Program-Specific Guidance about Portable Gauge Licenses,' dated November 2001, section 8.3.

Finally, please also be reminded of the provisions in 10 CFR 30.9(a), "Completeness and accuracy of information," which require that..."(a) Information provided to the Commission by an applicant for a license or by a licensee or information required by statute or by the Commission's regulations, orders, or license conditions to be maintained by the applicant or the licensee shall be complete and accurate in all material respects."

If you have any questions concerning this amendment, please contact me at 630-829-9892. My fax number is 630-515-1078.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9892 so that we can provide appropriate corrections and answers.

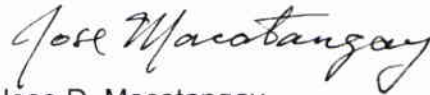

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions.

C. Villarreal

Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

Sincerely,

Jose D. Macatangay
Materials Licensing Branch
