Dear Mr. Leyse:

Your attached e-mail request dated February 17, 2010, to Stephen Burns, the General Counsel of the NRC, requested the NRC to publicly release certain documents which you associate with the NRC's denial of your petition for rulemaking (PRM-50-76; 70 FR 52893; September 6, 2005).

Our library has obtained a copy of one of these reports, BMI-1154, "Studies Relating to the Reaction Between Zirconium and Water at High Temperatures", by Lemmon, Jr., A.W. (1957). BMI-1154 has subsequently been made available to the public through ADAMS (ML100570218). A copy of the file is included as a courtesy to you. With respect to the other documents you requested, our efforts are continuing and you will be informed separately regarding their availability.

Sincerely,

Richard Dudley  
Rulemaking Project Manager  
Division of Policy and Rulemaking  
Office of Nuclear Reactor Regulation  
301-415-1116
