SUBJECT: NEW LICENSE 50-29386-01

We kindly refer to our NRC Form 313 Application for Materials License, March, 2010, Item's 5 and 6, where we asked for enough nuclear material to accommodate four Seaman C-200 gauges, and five Seaman C-300 gauges. We have noticed that Item D on NRC License number 50-29386-01 only allows for three total Seaman C-200 gauges with maximum activity of 16.5 millicuries. We also noted that Item E on NRC License number 50-29386-01 only allows for two Seaman C-300 gauges with maximum activity of 11 millicuries.

We kindly request that NRC License number 50-29386-01 be amended to allow for total activity for Item D to read "5.5 millicuries per source and 22.0 millicuries total", and Item E to read "5.5 millicuries per source, and 27.5 millicuries total."

This change will allow us to accommodate the future growth our company anticipates.

If you have any questions about this request, please contact us.

Sincerely,

Lawrence J. Schmidt  
Radiation Safety Officer
