Subject: Amendment Request
Notification of vacating existing space for new construction

Dear NRC official:

We are beginning the construction phase of our Nuclear Medicine Camera relocation project on or about April 19th. The unit will be relocated to another room and we will be vacating the space in order to install an MRI scanner. The plans have all been previously submitted in writing and are on file with the NRC.

We will perform the necessary wipe testing and area survey deeming the space clear of any contamination for your records.

Please expedite this amendment request and contact us with any further recommendations.

Thank you,

Sincerely,

Robert C. Gumbardo M.D.
