**To:** 'Cameron, Marilyn'  
**Subject:** RE: CLARIFICATION FOR AMENDMENT REQUEST DATED JANUARY 28, 2010

Thank you very much for your prompt response Ms. Cameron:

One more question/clarification: You requested that Mr. Steve McGrath be added as an authorized user for Ra-226 and Ni-63 electron capture devices; however, as stated to you previously you are generally licensed to receive the Ra-226 standard in accordance with 10 CFR 31.8; therefore, I will not have to line list the Ra-226 calibration/reference standard on your license. Please note that there is not a current authorization on your license to use Ni-63 electron capture devices. I think the Ni-63 devices that you currently use are generally licensed devices; therefore, they are not specifically listed on your specific license.

Please provide the following regarding adding Mr. McGrath as a proposed authorized user.

1. Please specify the types and quantities of licensed material to be used by Mr. McGrath.
2. Please submit information demonstrating that Mr. McGrath is qualified by training and experience to use the requested licensed materials. (Please provide information about Mr. McGrath's training and experience relative to the licensed material requested that you are currently authorized for on your license).

Please try to respond NLT COB today, Wednesday, April 7, 2010.

Again, thanking you in advanced for your cooperation and prompt assistance in this matter.

If you have any questions or require further clarification, please don't hesitate to contact me at the phone numbers and/or email address listed below.

Sincerely,

Jacqueline "Jackie" D. Cook  
Senior Health Physicist
