Subject: RE: CLARIFICATION FOR AMENDMENT REQUEST DATED JANUARY 28, 2010

Ms. Cook:

In accordance with our discussion this morning regarding the Ra-226 standard and Mr. Steve McGrath, I am withdrawing my request to add Mr. McGrath to our license. He will only be using the Ra-226 standard and the Ni-63 electron capture device, both of which are generally licensed. Thank you for your assistance.

Subject: ACT: CLARIFICATION FOR AMENDMENT REQUEST DATED JANUARY 28, 2010
Importance: High

Ms. Cameron:

I am doing the technical review of your amendment requests dated January 4, and 28, 2010. In your amendment request dated January 28, 2010, you stated that you are using a scintillation counter in your newly opened NRB. Please clarify if the physical address of the NRB is 1300 West Park Street, Butte, MT.

In addition, because you sent us the documentation of the purchase of your Ra-226 calibration/reference standard, you are generally licensed to receive this standard in accordance with 10 CFR 31.8; therefore, I will not have to line list the calibration/reference standard on your license unless you exceed the quantity specified in 10 CFR 31.8 of 5 microcuries Ra-226.

Please try to respond NLT by COB tomorrow, Wednesday, April 7, 2010.

Thanking you in advanced for your cooperation and prompt assistance in this matter.

If you have any questions or require further clarification, please don't hesitate to contact me at the phone numbers and/or email address listed below.

Sincerely,

Jacqueline "Jackie" D. Cook
