General Comment

It is my belief that as long as a nuclear site can maintain a safe environment for spent fuel, that it should be allowed to continue operation. Removing viable nuclear energy sources is not a good thing in an economical, political, or environmental sense. Just because the current administration believes that Yucca Mountain is not viable for storage, this position does not directly correlate to the operability of the nations nuclear power plants, or the safe storage of spent fuel. This petition should not be acted on.
