Re: Indian Point Unit No. 2
Docket No. 50-247

Director of Nuclear Reactor Regulation
ATTN: Mr. Albert Schwencer, Chief
Operating Reactors Branch No. 1
Division of Operating Reactors
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Schwencer:

By letter dated June 29, 1979, Westinghouse WCAP-9600, "Report on Small Break Accidents for Westinghouse NSSS System," was forwarded to Mr. Denwood F. Ross, Jr., Deputy Director of Project Management by the Chairman of the Westinghouse Operating Plants Owners' Group. The purpose of this correspondence is to inform you that the behavior modes and qualitative results illustrated in the report are applicable to Indian Point Unit No. 2. The report also provides generic results that are generally conservative for Indian Point Unit No. 2. Section 6 of that report contains revised Westinghouse emergency operating instructions which are being reviewed for applicability to our facility and subsequent incorporation into our operating procedures as appropriate.

Very truly yours,

William J. Cahill, Jr.
Vice President
