

## SECTION IV

### HEADQUARTERS TRAINING REQUIREMENTS FOR ISFSI SAFEGUARDS INSPECTOR

#### A. APPLICABILITY

The training described below is required of NSIR program inspectors assigned to perform physical security inspections at Independent Spent Fuel Storage Installations.

#### B. TRAINING

1. Initial Training
  - a. Self Study and On-the-Job Training
    - (1) NRC and Orientation
    - (2) Code of Federal Regulations
    - (3) Office Instructions/Regional Procedures
    - (4) Regulatory Guidance
    - (5) NRC Inspection Manual
    - (6) Directed Review of Selected Site Security Plans and Procedures
    - (7) Inspection Accompaniments
    - (8) NRC Management Directives
  - b. Core Training. These courses establish minimum formal classroom training requirements. Refer to Section 1246-11 for exceptions to these requirements.
    - (1) Security Fundamentals Course (S-301) - Security Requirements for Stored Waste Module
    - (2) Site Access Training (H-100)
    - (3) Introduction to Physical Security S118S
    - (4) Expectations of Inspectors (G-104)

- c. Supplemental Training. Additional training beyond that identified as Core Training. This training will be determined by the individual's supervisor and will depend on the individual's previous work experience and planned inspection or licensing activities in specific areas
  - (1) Explosives, Blast Effects, and Breaching Field course (S-502)
  - (2) Nuclear Technology for Security Course (R-105)
  - (3) Advanced Intrusion Detection and Assessment course (TBD)
  - (4) Weapons and Tactics Fundamentals Field Course (S-501)
  - (5) Fundamentals of Inspection Course (G-101) or Inspection Procedures Course (G-108)
  - (6) Inspecting for Performance - Materials Version (G-304)
  - (7) Effective Communications for NRC Inspectors
  - (8) Physical Security Fundamentals Course (S-103) or equivalent
  - (9) Sensor System Course (S-118) or equivalent
  - (10) Vulnerability Assessment Fundamentals (CTA-140)
  - (11) Accompany region inspector on two reactor inspections
  
- 3. Refresher Training. Refresher training will be conducted every three years following initial certification. Refresher training will include the following course and other courses as determined by management:
  - a. Fundamentals of Inspection Refresher Course (G-102)
