Joan:

Attached are Monica's comments on the New Jersey final regulations. Neither Torre or I have reviewed the comments but I wanted to provide them to you so that you could have the information for your legal review. We will send the comment letters over for the formal process shortly.

Dennis

Subject: Comments on New Jersey Final Regulations

Dennis and Torre:

Here are the Comment Resolution (from our review of their proposed regulations) and New Comment Tables for the New Jersey Final Regulations. In my opinion none of the New Comments should hold up the processing of the New Jersey Application, however they are corrections that New Jersey will need to address in the future. That being said if you decide to not do a deficiency letter Kathy and I will send New Jersey a normal Regulation Review letter so we can track their need for corrections. In the meantime after both of you review the documents please pass them along to OGC for review and NLO concurrence.

I/10

Let me know if you have any questions.

Thanks,
Monica
