Jack

As I mentioned this morning SMC is planning to submit Rev 1b of the subject Decommissioning Plan to NRC by the end of the month. Our official submission will be the paper copy of the DP and it will be sent directly to the Document Control Desk in accordance with your previous directions. The SMC team is working hard to complete the publication of the DP Rev 1b so that it can be sent out tomorrow, Friday August 28th. If we are able to get it out the door tomorrow, it should arrive by Monday morning. We will also be sending you and other members of the staff, copies of the DP Rev 1b on CDs for your use and convenience but once again the official hard paper copy will be sent the Document Control Desk.

SMC believes that Rev 1b addresses all of the RAIs as well as other questions and comments that you and your staff have asked over the last couple of years. SMC is looking forward to NRC docketing of the subject

5/27

submission expeditiously and working with you and your staff towards final approval of the DP so that it can be implemented in a timely manner.

I want to thank you and say that I personally appreciate all of your help and coordination with this complex process. This has been a costly and time consuming technical effort but it should provide you and the staff with the data and explanation why this approach is clearly the best way to Decommission the Newfield facility. After you have had an opportunity to thoroughly review all the additional site specific information, I think you will surely have to agree that the approach and assumptions presented in our original DP submission were even more conservative than required based upon this additional site specific information. This additional technical information should however help you and the staff explain to public why this is truly the correct approach for decommissioning the site.

If you have any questions please feel free to contact me directly at (856) 967-6531 - Newfield Office, or (610) 446-8462 - Havertown Office, or via e-mail [www.dsmith@shieldalloy.com](mailto:www.dsmith@shieldalloy.com)

Sincerely,

Dave
