Mike,

Thanks for the comments. You're correct that we interested in iron. I was assuming all of the iron-based materials are steels (not cast iron, for example). I'm going to change that to make sure it includes all iron-based materials.

Greg

Greg,

Looks pretty good to me. The only thing that I note is that you're asking for steel to be included in the analysis. That's ok, but is it the steel or the iron that we're really interested in...or both? I would think both. Also, I see that you are asking for information on the Zn. Good. This may come as a surprise to them, but we need the information. That's why I suggested being sure to keep Tonacci in the loop...to help potentially reduce the surprise. Good work!

mike
