Subject: draft email to BLM

Irene, Patti, and Alan,

Here's the email to send to Pete Sokolosky of the BLM to notify him that you've uploaded your files to the FTP site. Pete's email address is below this email and Alan previously sent out the FTP site information. Andrea reviewed this email already.

Jim

Dear Pete,

This is to let you know that I as the project manager for the [project name] SEIS, have uploaded the following files to the FTP site: [list files/folders and the location uploaded to].

In doing so, I am requesting BLM review and comments on these documents, with particular focus on Chapters 3 (Affected Environment), 4 (Impacts), and 5 (Cumulative Impacts). It is important for the BLM reviewers to understand that the document(s) is/are in the preliminary final draft stage prior to final NRC management and legal review and concurrence. After management and legal concurrence, we will be publishing the draft SEIS for public comment.

The NRC staff is still in process of revising this draft and as such, is still closing any remaining data gaps, confirming references cited, and finalizing document formatting. Our current schedule has this draft SEIS entering our agency publication review and printing processes by November 23, 2009.

Therefore, to allow for document revision and review/concurrence prior to that date, I ask that any comments from the BLM be provided by October 5, 2009. However, depending on the extent of BLM's comments, I may not be able to completely address those comments in the draft SEIS.

Additionally, I would like the opportunity to discuss by phone the BLM reviewers' main comments so that, again to the extent possible, I can address these comments in the draft SEIS. I would like to have this phone call on or prior to October 5th.

Thank you for helping with this.
