Re: License No. 37-19159-02
Docket No. 030-37931
Amendments to License

Dr. Lohdi:

As a result of our recent inspection visits in New Haven, Ct. and Erie, PA we have been advised to submit the following requests for amendments to our license, as referenced above:

Paragraph 8A:

Because we are eventually going to convert all of our nuclear gauges to Humboldt Model 5001EZ, 121, and because our work areas have expanded somewhat, we request that the maximum amount of Cesium 137 that we are allowed to possess be revised to 165 millicuries. This will allow us to increase our total inventory to 15 units at a maximum per unit of 11 millicuries.

Paragraph 8B:

For the same reason as above, we request that our allowable maximum possession limit for Americium 241 be increased to 660 millicuries (15 units @ 44 mc/unit)

Paragraph 10:

As a result of the inspection in New Haven, CT, we were advised to list that location as an additional storage facility since we will have a single gauge there for a period exceeding one year. The address is New Haven Rail Yard Complex, 2 Brewery Street, New Haven, CT 06510

Thank you in advance for your assistance in this matter.

Respectfully,
URBAN ENGINEERS OF ERIE, INC.

Dennis R. Sifale
Radiation Safety Officer
