Maurice Dingler, Engineer V
Wolf Creek Nuclear Operating Corporation
1550 Oxen Lane NE
Burlington KS 66839-0411

Dear Mr. Dingler:

Thank you for presenting at the U.S. Nuclear Regulatory Commission's (NRC) 22nd Annual Regulatory Information Conference (RIC), March 9 – 11, 2010, in Rockville, Maryland. This year the total number of participants exceeded 2,800, including international representatives from over 25 countries.

Initial feedback from participants indicates that this year's RIC was another resounding success. Your dedication and support helps the U.S. NRC to "raise the bar" each year to develop a comprehensive program filled with discussion topics that are timely and relevant.

Your presentation on "PWROG Resolution of GSI-191" during the Generic Safety Issue 191 session provided important information and another perspective about initiatives that are underway regarding emergency core cooling system strainer performance.

All final presentation slides are posted on the NRC's RIC website at: <http://www.nrc.gov/public-involve/conference-symposia/ric/index.html>. Again, thank you for your participation at NRC's 2010 Regulatory Information Conference. It is your commitment and support that helped to make the RIC a success.

We hope you will join us for the 23rd Annual RIC March 8-10, 2011, at the Marriott Bethesda North Hotel and Conference Center, Rockville, Maryland.

Warm regards,

/RA/

Michael Scott
GSI-191 Session Chair
