ORGANIZATION

Michigan State University

SUBJECT

Amendment request issues/clarifications

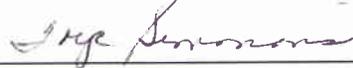

SUMMARY

1. Q: Why do you need 30 curies of Fluorine-18 and Nitrogen-13?
A: Rarely if ever would have that quantity. It is used for clinical studies only.
NOTE: the above isotopes will added to the license as line items, the isotopes fall under 35.200 uses.
2. Q: Please provide a copy of receipt for the PuBe source.
A: Source was disposed of via DOE/Los Alamos program in 2004. Will fax the requested record as soon as possible.
3. The licensee requested relief from condition 22 of the license. However this is standard condition and will not be changed. The licensee thought that the 10% of limits applied to i-125. It did not it applied to I-129.
4. This reviewer clarified with Ms. Bronson that the RSC will determine specific isotope use labs as well as users for the new locations of use. No material is currently being used at these locations.
