Yes. We are now in a building beside the licensee investigative team. It should make for easier communications, etc.

FYI. The Special Inspection Team is located outside of the Protected Area and the team does not get into the Resident Inspectors' office as often as normal. You can reach Lou Lake at: (352)-795-6486, extension 1534. Each of the team members will have a similar number and you will be informed of the number as the team members return to the site over the next week or so.
