Subject: Comanche Peak RCOL Chapter 1 - RAI Number 154
Attachments: RAI 4494 (RAI 154).docx

The NRC staff has identified that additional information is needed to continue its review of the combined license application. The NRC staff's request for additional information (RAI) is contained in the attachment.

The response to this RAI is due after the staff has completed its review of the USAPWR DC, including subsequent rulemaking.

Note: If changes are needed to the safety analysis report, the NRC staff requests that the RAI response include the proposed changes.

thanks,

Stephen Monarque

Request for Additional Information (RAI) No. 4494 COLA Revision 1

RAI Number 154

4/27/2010

Comanche Peak Units 3 and 4
Luminant Generation Company, LLC.
Docket No. 52-034 and 52-035
SRP Section: 01 - Introduction and Interfaces
Application Section: Chapter 1

QUESTIONS for USAPWR Projects Branch (NMIP)

01-3

In accordance with 10 CFR 52.83, "Finality of Referenced NRC approvals; partial initial decision on site suitability," if the application for a combined license (COL) references a design certification (DC) rule, the scope and nature of matters resolved in the DC for the application and any COL issued are governed by 10 CFR 52.63, "Finality of standard design certifications."

Based on the finality afforded to referenced certified designs, the scope of this COL application review as it relates to the referenced design is limited to items that fall outside the scope of the certified design (e.g., COL information items, design information replacing conceptual design information, and programmatic elements that are responsibility of the COL applicant). Luminant is requested to supplement this COL application, based on the outcome of the NRC staff's review of the USAPWR DC, including subsequent rulemaking. This activity is being tracked as Open Item 1-1.
