Kriss,

Recommend #3 or #4 (below) as meetings you or Chris may want to attend.  
I'll plan to be at both.

Thanks,  
Mark

Mark and Kriss;

Kriss - Apparently you have a badge for Harris but when you get on site you will need to get it keyed-in at Crystal River and hand geometry. Also your training is scheduled to expire at the end of this month, therefore, attached is an e-mail identifying the actions you need to take to keep your training current.

The following meetings, scheduled over the next month, will contain De-lamination project presentations that will have varying degrees of NRC interest. Although members of the SIT will be attending these meetings, I thought they may fall into those that you may also want to consider attending.

1. January 13 - Nuclear Safety Oversight Committee (NSOC) meeting. Status of De-lamination project will be presented.
2. Date in January TBD - PNSC meeting. Final de-tensioning plan will be presented. Probably end of next week
3. Date end of January/early February - PNSC meeting. Root Cause presentation.
4. February date TBD - NSOC meeting. De-lamination Project comprehensive presentation.

Garry Miller (Project Manager) will inform me in a timely manner with firm meeting dates. Let me know those that you have selected.

Lou
