Subject: FOIA on Crystal River Containment

The Division received a FOIA request on information on Crystal River's containment failure issues. The request is for any public meeting or NRC meeting minutes, photos and information on the containment cracking issue. We do not have to provide the info yet but they are requesting an estimate on the amount of material and how much time it will take to search and collect. Lou Lake has the FOIA for action, please provide him with your estimates by later today. Lou has more detail on the request.

Thank you
Chris
