Director of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Attention: Mr. Steven A. Varga, Chief
Operating Reactors Branch No. 1
Division of Operating Reactors

Subject: Indian Point 3 Nuclear Power Plant
Docket No. 50-286
Proposed Change of the Auxiliary Feedwater System
Technical Specifications

Dear Sir:

Enclosed for filing are three (3) signed originals and nineteen (19) copies of a document entitled, "Application for Amendment to Operating License," and attachments thereto.

This application seeks to amend Section 3.4 of Appendix A of the Operating License in accordance with the Commission's March 5 and July 15, 1980 letters which requested Technical Specifications for the valves in the single line from the Condensate Storage Tank.

In accordance with 10 CFR 170.22, the Authority has classified this application as Class III because acceptability for this change has been clearly identified by the Commission's July 15, 1980 interim safety evaluation report for the auxiliary feedwater system. Therefore, as required by the regulation, enclosed is a check for \$4,000 for the filing fee, which the Authority pays under protest pending a final determination of the legality of the fee schedule.

In support of this application we are enclosing forty (40) copies of the Safety Evaluation corresponding to these proposed changes to the Technical Specifications.

Very truly yours,

G.M. Walbrinding
J. P. Bayne
