Jim,

Please respond by 01/22 and follow up with complete response when available.

Thanks,

George

Subject: RAI Question 06.02.01.01.C-13, RAI 4166

RAI 06.02.01.01.C-13 is asking some questions on the node size and the maximum bubble size used in the pool swell analysis. The 30-day response time makes this due 1/22/10. To answer the question, we will need to perform some computer runs to determine the sensitivity to these parameters. We estimate this would take us until the end of February to complete , perform the necessary checking , and submit to you in an RAI response. The question is : Should we request an RAI response extension until the end of February for this question, or should we provide an answer on 1/22 that outlines how we will do this sensitivity analysis and supplement the response at the end of February with the results from the sensitivity analyses?
