Thanks, RI. As some point, when the dust settles, it may be worthwhile to review the event to see how we got to where we are on an event of no safety significance.

**Subject:** TMI 0309 Review

Sam,

We have completed our evaluation of the entry conditions and the deterministic criteria in IMC 0309 for consideration of a reactive inspection. None of the deterministic criteria are met, thus our recommendation is to continue with baseline event followup inspections through the resident staff supplemented by DRS (Ron Nimitz).
