Comments: **Question 27** was discussed with candidates. The question is based around MODE 6 operations that are primarily covered in the classroom. They understand after review that the purpose of the question was to assess their knowledge of requirements for containment integrity while moving fuel. We consider discussion of this topic as adequate assessment and closure for this high miss question. **Question 80** was discussed with the SRO candidates and those that missed the question stated they just did not recall the CET temperature entry into SACRG-1. We consider discussion of this topic as adequate assessment and closure for this high miss question. **Question 97** was discussed with the SRO candidates and those that missed the question said they were going to pick either A or B and understand why A is not correct. We consider discussion of this topic as adequate assessment and closure for this high miss question.
