Editor,

I was arrested in front of Diablo in 1978 because PG&E did NOT know what they would do with the nuclear waste. I was told the problem would be taken care of after it was created. I assume that meant the Yucca Mountain storage site.

Here we are 32 years later with no functioning storage site and the waste building up at Diablo. I suggest the large casks of nuclear waste be stored in the backyards of the Nuclear Regulatory Commission rather than upwind to where I live-----Nipomo.
