Irene,

There is not a specific reference to the number of resin transfers per day in the license application. However there is an estimate of 6 tractor trailers/week traveling between Hank and Nichols which includes resin transfers, chemical shipments, and yellowcake shipments. Based on the yearly production from Hank, a resin truck would travel from Hank to Nichols Ranch once every 2 to 3 days.

Mike

Subject: another question

Where in the application does it indicate the expected number of resin shipments from satellite facility to CPP per day?
