 Division of Fuel Cycle and Material Safety  
 Advanced Fuel and Spent Fuel Licensing Branch  
 Willste Building  
 7915 Eastern Avenue  
 Silver Spring, Maryland 20910

Attention: Mr. Leland C. Rouse

Subject: Docket 70-687, SNM 639, Renewal Application

Reference: (a) USNRC, L. C. Rouse letter, dated 11/15/82

The enclosed copies of the SNM-639 license conditions and safety demonstration are submitted in support of our application to renew the subject license. It has been written according to the guidance provided in reference (a) above, Regulatory Guide 3.52, and recent meetings. One copy of the latest Union Carbide Annual Report is enclosed as evidence of financial accountability per Section II.9 of the application.

The enclosed document presents a complete review of current and foreseeable operations. It is written in a general sense to preclude frequent future amendment applications over the renewed license term. Considering the effort to produce and process this renewal, we request that the Commission grant the maximum permissible term and that this term commence upon the date of renewal.

Very truly yours,

*J. J. McGovern*
