**Summary of  
AREVA Enrichment Services LLC  
Eagle Rock Enrichment Facility  
Management Meeting**

DATE: May 12, 2010

PLACE: U.S. Nuclear Regulatory Commission (NRC)  
Rockville, MD

ATTENDEES: See Attachment 1

PURPOSE:

The purpose of this meeting was to discuss management issues and project status related to the AREVA Enrichment Services LLC's (AES) license application for the Eagle Rock Enrichment Facility (EREF). A previous management meeting was held in October 2009. The meeting agenda is in Attachment 2.

DISCUSSION:

AES provided an update on the project status for the EREF. A copy of the AES handout is attached (Attachment 3).

Related to discussion about NRC's visit to the Georges Besse II facility, NRC shared insights regarding lessons learned from construction of an enrichment facility in the United States. For example, if construction will be completed in phases, a licensee should provide information in the Safety Analysis Report as to how each phase will be operated; how the phases may affect items relied on for safety (IROFS); any hazards introduced by constructing while operating; and any IROFS needed to protect the operating portion of the facility.

After the business portion of the meeting, members of the public were given an opportunity to ask questions or make comments. The Snake River Alliance asked several questions, including questions about the intended markets for contracted product from the proposed facility and the disposition of depleted uranium. Additionally, the Snake River Alliance suggested that the NRC consider holding public meetings related to the EREF in Boise, Idaho.
