Docket No. 70-687

MEMORANDUM FOR: Leland C. Rouse, Chief  
Advanced Fuel and Spent Fuel Licensing Branch  
Division of Fuel Cycle and Material Safety

FROM: A. Thomas Clark, Jr.  
Advanced Fuel and Spent Fuel Licensing Branch  
Division of Fuel Cycle and Material Safety

SUBJECT: MEETING WITH NEW YORK STATE REPRESENTATIVES  
ON LICENSING ASPECTS AT UNION CARBIDE (TUXEDO)

On January 28, 1981 Tom Elsasser, Region I State Liaison Officer, and I met with the New York State representatives indicated in the attached list. The meeting was held in the 10th floor conference room of Agency Building No. 2, Empire State Plaza, Albany, New York.

Two general topics were discussed at the meeting: 1) the division of responsibility between the NYS licensing authority, the Department of Labor, and the NRC, and 2) planning and agreement for review and approval of a comprehensive emergency plan for the Tuxedo site.

On the first subject the State of New York proposed that all hot cell activities be under NRC jurisdiction; other by-product licensing activities in other buildings would remain under the New York State Department of Labor. This arrangement would clarify licensing authority responsibility.

On the second topic it was agreed that a comprehensive site emergency plant would be desirable. It was suggested and agreed to by all New York State agencies present that a letter addressed to Mr. William E. Davis of the New York State Energy Office from an appropriate NRC official would be satisfactory for initiating the agreement. The reply from Mr. Davis would include a statement to the effect that all pertinent New York State agencies were in agreement with the approach. I am preparing the initial letter for concurrences.

Original signed by
