MAY 11 2010

Jose Evangelista, M.D.  
Radiation Safety Officer  
Livonia Diagnostics, P.C.  
10475 Farmington Road  
Livonia, MI 48105

Dear Dr. Evangelista:

Enclosed is Amendment No. 3 renewing your NRC Materials License No. 21-26684-01 in accordance with your request.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

Please note, that we have reformatted Subitem Nos. 6, 7, and 9 and Condition No. 12 to remove all references to exclude authorizations such as "generators, xenon-133, and limited to cardiovascular procedures."

Please be reminded, however, that you are still bound by the restrictions imposed by the excluded authorizations contained in documents incorporated into your license by Condition No. 17.

Also note, we have added License Condition 15, that requires you to follow the commitment as stated in NUREG-1556, Volume 9, Revision 2, regarding occupational dose because your renewal application dated May 4, 2010, contained two different commitments for determining occupational dose. We have also added License Condition 16, that requires you to follow the commitment as stated in NUREG-1556, Volume 9, Revision 2, regarding area surveys, because your renewal application dated May 4, 2010, contained two different commitments for performing area surveys.

The facility diagram submitted with your renewal application dated May 4, 2010, was difficult to read because of the poor quality of the facility diagram. Within 30 days of the date of this letter, please resubmit your facility diagram and include all of the information requested in NUREG-1556, Volume 9, Revision 2 (copy enclosed). Please include all the information requested in the enclosed, "Request for Additional" information. Please resubmit your facility diagram as additional information to control 318673.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

J.Evangelista

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you.

This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions.

Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

Sincerely,

William P. Reichhold  
Materials Licensing Branch
