Agreement State Application

Interest was generated based on retention of current NARM licensees and significant events such as the H-3 exit sign remediation events.

- Governor Corzine by letter dated May 23, 2006 notified NRC that New Jersey intended to pursue becoming an Agreement State.
- On August 9, 2006, NRC sent comments on the New Jersey legislation.

- On August 3, 2007, NRC sent comments on the revised New Jersey regulations.
- By letter dated September 19, 2007, New Jersey submitted a draft application to become an Agreement State.
- By letter dated January 11, 2008, NRC sent comments to New Jersey on the draft application.
- By email dated February 19, 2008, New Jersey submitted revised proposed regulations for NRC review. The regulations are under review at this time.

Future activity:

- New Jersey has indicated that they intend to submit the final package from the Governor in September or October of 2008. This would make the most likely effective date for the new Agreement to be September 30, 2009. (This is after the August 5, 2009 date for the waiver termination for NARM materials under the Energy Policy Act of 2005. We will need to work out how we are going to handle this issue to avoid a whip-lash effect on New Jersey NARM licensees.)
