Subject: follow-up to meeting on NJ Agreement

Hello Robert,

Thanks for taking the time to meet with us regarding your questions on the NJ Agreement. I checked into the references back to definitions in the Act in the Background section of the FRN regarding source material and special nuclear material. There is no reason to have the references to Section 11z. and 11aa. of the Act. Therefore, we would recommend that it be removed from the background section to maintain consistency as you pointed out. We will be make all the revisions to the FRN once we have the SRM with all the comments/edits from the Commission.

thanks,

Torre
