Subject: Re: Security and Fingerprinting Requirements

Monica,
That is fantastic. Thanks.
Jenny

Jenny:

I should have your package back from our lawyers by the end of this week. As soon as I receive it I will call you and let you know if there are any additional comments. Worst case scenario I should have an official answer to you by Monday March 31st. Please let me know if I can help with anything else.

Thanks,
Monica

Dennis,
Pat is aware of those requirements, thanks for the reminder. Any chance we could get comments on our proposed rule from the NRC attorneys by April 2? We did not make our filing date, so we have about a week and a half window now to incorporate any changes they may have.

Jenny:

In discussions today, I was reminded that New Jersey will need to have Orders/License conditions for the Increased Controls (ICs) and fingerprinting requirements. Although NRC may have these incorporated in the NRC licenses when they are transferred to New Jersey the language would refer to NRC for reporting requirements reference the NRC Orders which may not be legal after the Agreement goes into effect and any new licenses would have to include the requirements. Therefore, we would need to review the New Jersey equivalent of the NRC IC and Fingerprinting Orders/license conditions prior to recommending approval of the proposed New Jersey Agreement in order to make the finding of a compatible program in this area.

I wanted to get this to you so that it would not be a show stopper when you submit the final package.

Dennis Sollenberger
