### 1.0 BACKGROUND

Combined License (COL) Applications are submitted pursuant to Part 52 of Title 10 of the Code \_\_of Federal Regulations (10 CFR 52), "Early Site Permits; Standard Design Certifications; and Combined Licenses for Nuclear Power Plants." The U.S. Nuclear Regulatory Commission (NRC) reviews COL Applications based on information furnished by electric utility companies pursuant to 10 CFR 52.79, "Contents of Applications Technical Information."

A Standard Review Plan (NUREG-0800) is prepared for the guidance of staff reviewers in the Office of New Reactors in performing safety reviews of applications to construct or operate nuclear power plants and the review of applications to approve standard designs and sites for nuclear power plants. The principal purpose of the SRP is to assure the quality and uniformity of staff safety reviews.

An Environmental Safety Review Plan (NUREG-1555) is prepared for the guidance of staff reviewers in performing environmental reviews of applications related to nuclear power plants. The ESRPs are companion to regulatory guides that address siting and environmental issues. As with NUREG-0800 the purpose of the ESRP is to assure the quality and uniformity of environmental reviews.

The staff publishes the results of these reviews in a Safety Evaluation Report (SER).

## 2.0 OBJECTIVE

The objective of this task is for Information Systems Laboratories, Inc. (ISL) to assist NRC's Office of New Reactors (NRO) in analyzing and reporting activity on new reactor licensing work. The effort will be led by the ISL Project Manager. (This SOW supersedes and replaces the Project Management task.)

This Project Reporting task includes new reactor licensing support continuity (both period of performance and funding) throughout the entire project. This task only relates to reporting activity and special reports.
