ORGANIZATION				
Century Industries				
SUBJECT				
Call to Century Industries regarding the Versa-Pac package application				
SUMMARY (Continue on Page 2)				
NRC Staff: Pierre Saverot				
Staff called Mike Arnold (Century Industries - CI) to let him know that a request for additional information will be sent out shortly, i.e. either today or tomorrow.				
Staff explained that CI will be requested to provide objective quality evidence that QA programmatic controls were in place for all aspects of the package application from the fabrication of the prototype packages for full scale testing, to the conduct of the tests, and to the modeling and calculation results for thermal and criticality.				
Staff explained that it has assumed that a QA program was appropriately implemented, during the development of the package submittal, but that RIO inspection revealed that this might not have been entirely the case.				
Staff said that, in order to alleviate any concern, it will request CI to provide objective quality evidence to support their assertion and their package application.
